FINDINGS LIST

Name	Severity
 DEXPRIV-2 <u>More than 5% of total DXLYN supply cannot be deposited into the Voting Escrow</u>	• High
 DEXPRIV-6 <u>Stuck supply when calling `dxlyn_coin::init_module()` leads to incorrect reward distribution</u>	• High
 DEXPRIV-1 <u>Token Freeze Bypass in `dxlyn_coin.move`</u>	• Medium
 DEXPRIV-3 <u>Unable to change `withdrawal_address` in `Vesting.move`</u>	• Medium
 DEXPRIV-7 <u>1 wei depositor earns entire weekly rebase distribution</u>	• Medium
 DEXPRIV-10 <u>Missing admin change ability in `emission` and `vesting` files</u>	• Medium
 DEXPRIV-4 <u>Unable to set (or change) `beneficiaries` value in `Vesting.move`</u>	• Low

Name

Severity

DEXPRIV-11

Gauge contracts never implement
`get\_reward\_distribution()`

• Low

DEXPRIV-12

Admin can accidentally sweep DXLYN coins out
of `fee\_distributor`

• Low

DEXPRIV-8

`schedule.total\_emitted` is double counted in
`emission.move`

• Informative

DEXPRIV-5

Emissions cannot be paused due to
`schedule.is\_paused` never being referenced

• Informative

DEXPRIV-9

Emissions and epoch counter skipped and
desync if not called every week

• Informative

DEXPRIV-13

QA/Informationals

• Informative

CONCLUSION

ABOUT DEXLYN

The audit makes no statements or warranties on security of the code. It also cannot be considered as a sufficient assessment regarding the utility and safety of the code, bugfree status or any other statements of the contract.

It is important to note that you should not rely on this report only - we recommend proceeding with several independent audits and a public bug bounty program to ensure security of smart contracts.

TECHNICAL DISCLAIMER

Smart contracts are deployed and executed on blockchain platform. The platform, its programming language, and other software related to the smart contract can have its vulnerabilities that can lead to hacks. Thus, the audit can't guarantee the explicit security of the audited smart contracts.
