SUMMARY REPORT

Bluefin Audit Contest

SMART CONTRACTS CODE LANGUAGE

Move

REPORT CREATED

03.04.2024

AUDIT DURATION

13.02.2024 - 17.03.2024

PREPARED BY

HackenProof team

This report was prepared for the Bluefin Audit Contest.

The report contains information about participants, in-scope targets as well as information about vulnerabilities found and fixed in the smart contracts code.

The report data was disclosed publicly after all vulnerabilities were fixed - upon a decision of the Bluefin team.

Approved by	HackenProof team
Name	Bluefin Audit Contest Summary Report
Type	Smart Contracts
Technology	Move
Timeline	13.02.2024 - 17.03.2024
Deployed contract / GitHub	Private

OVERVIEW

ABOUT BLUEFIN

Bluefin is a perpetual futures DEX built on the Sui blockchain. The platform offers a superior trading experience that is supported by the best available technology - a fast, secure network with effortless account management.

SCOPES AND TARGETS

Target	Type	Tech
https://github.com/hackenproof/bluefin-exchange-contracts-sui	 Smart contract	 Move
https://github.com/hackenproof/elixir_bluefin_integration	 Smart contract	 Move

PAYMENT STATISTICS

REWARDS DISTRIBUTION

- 40% for critical issues
- 30% for high issues
- 15% for medium issues
- 5% gas optimization issues, best practices

BUDGET

\$45 000

TOTAL PAID OUT

\$22 500

CONCLUSION

ABOUT BLUEFIN

The audit makes no statements or warranties on security of the code. It also cannot be considered as a sufficient assessment regarding the utility and safety of the code, bugfree status or any other statements of the contract.

It is important to note that you should not rely on this report only - we recommend proceeding with several independent audits and a public bug bounty program to ensure security of smart contracts.

TECHNICAL DISCLAIMER

Smart contracts are deployed and executed on blockchain platform. The platform, its programming language, and other software related to the smart contract can have its vulnerabilities that can lead to hacks. Thus, the audit can't guarantee the explicit security of the audited smart contracts.
