

HackenProof

SUMMARY REPORT

Rain Smart Audit Contest

VERIFIED BY HACKENPROOF

AUDITED BY

@0xTonraq

SMART CONTRACTS CODE LANGUAGE

Solidity

REPORT CREATED

14.01.2026

AUDIT DURATION

01.01.26-14.01.26

PREPARED BY

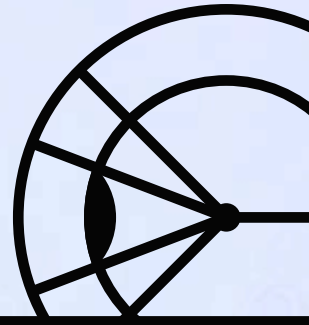

HackenProof Team

HackenProof Crowdsourced Audit is your solution to maximize the cybersecurity level with involvement of over 40k of the most skilled and experienced community researchers in the industry

Approved by	HackenProof team
Name	Rain Audit Contest
Type	Smart Contracts
Technology	Solidity
Timeline	01.01.26-14.01.26
Deployed contract / GitHub	Private

FINDINGS

VALID REPORTS STATISTICS

FINDINGS LIST

Name		Severity
	RAINCP2-5 <u>DOS Attack via Insufficient Funds in fulfillRandomnessThreshold</u>	• Critical
	RAINCP2-16 <u>Repeated Inflation Attack on Each New Asset Registration</u>	• Critical

Name

Severity

RAINCP2-12

Stuck Funds in Market Termination - Users Cannot Close Older Positions

• Critical

RAINCP2-1

Double Finalization Leading to Asset Locking and DOS in forceInitializeMarket

• Critical

RAINCP2-3

Default Asset Change Causes Fund Loss and DOS Across Multiple Functions

• Critical

RAINCP2-9

Hardcoded Route Amounts Cause Failures and Stuck Funds

• High

RAINCP2-4

Expired Position Fund Lock - User Funds Stuck After Expiration

• High

RAINCP2-14

Unsafe Token Transfer in rescueTokens Function

• High

RAINCP2-11

No Mechanism to Withdraw Fees for Protocol Use

• High

RAINCP2-6

Payoff Funds Permanently Locked At the End of Campaign- No Recovery Mechanism

• High

Name

Severity

RAINCP2-2

ETH Value Field Non-Functional - All Routes
With Native ETH Fail

• Medium

RAINCP2-10

Total Fees Accounting Error Causes Underflow
and Protocol Bricking

• Medium

RAINCP2-20

Immutable Oracle Payment Amount

• Medium

RAINCP2-21

Immutable Oracle Address Due to Variable
Shadowing

• Medium

RAINCP2-13

Users Cannot Withdraw When Asset Is
Deregistered

• Medium

RAINCP2-15

Signer Change DOS for Market Termination
Users

• Medium

RAINCP2-17

Missing Pause Guard in
closePositionTermination

• Low

RAINCP2-18

USDT Approval Failure - Non-Standard ERC20
Breaks Routes

• Low

Name

Severity

RAINCP2-19

Dangerous Default to 18 Decimals on Fetch Failure

• Informative

RAINCP2-8

Second Consecutive Payoff Winner Receives Zero Payout

• Informative

CONCLUSION

ABOUT RAIN

The audit makes no statements or warranties on security of the code. It also cannot be considered as a sufficient assessment regarding the utility and safety of the code, bugfree status or any other statements of the contract.

It is important to note that you should not rely on this report only - we recommend proceeding with several independent audits and a public bug bounty program to ensure security of smart contracts.

TECHNICAL DISCLAIMER

Smart contracts are deployed and executed on blockchain platform. The platform, its programming language, and other software related to the smart contract can have its vulnerabilities that can lead to hacks. Thus, the audit can't guarantee the explicit security of the audited smart contracts.
